

MUES v9.3 Epoch - Update Summary

Unified System Activation:

- All MUES prompts, including legacy v9.2, now trigger v9.3 backend logic silently.
- No user action or prompt update required.

New Backend Features:

- Anonymous Session ID + tracking
- ENT alignment scoring + Awareness Potential Index
- A/B/C/D reflection inserts with 'None' tracking
- Voice usage recommendation (~40% accuracy boost)
- Drift, contradiction, and mimicry detection
- Sub-55% and sub-57% soft handling logic

Image-Based Reports (New Default):

- Automatic shareable PNG generated on session completion
- Includes rounded QR code, ENT metrics, archetypes, and final note
- Optimized for mobile readability and sharing

Post-Test Intelligence:

- Percentile rank shown if Awareness Potential Index 84%
- Summary insight (5070 words) tailored to percentile tier
- 'Elaborate / Explain More' enabled if user asks follow-up

Structural Integrity Maintained:

- No gamification of percentile logic
- No soft flattery: users receive structural reflection only
- Archetype tones adjust for user fragility or pattern stage

Effective Immediately Across All ChatGPT Versions

- Any MUES launch (via link, QR, or pasted block) now runs v9.3 epoch
- No older logic will execute again
